

All Questions from „Documentation of User Research Findings and AI Support“

Category 1: Screening and professional profile

Do you currently work with user research, UX research, usability evaluation, HCI research, or related activities? (A1)

- Yes
- No
- Not currently, but I have done so in the past
- **Type of question:** Single Choice (Mandatory)
- **Conditions:** None

Which of the following best describes your current or most recent role? (A2)

- User researcher
- Designer
- Product manager
- Requirements engineer
- Consultant
- UX Manager
- Academic researcher
- Student
- Other (with text field)
- **Type of question:** Multiple Choice (Mandatory)
- **Conditions:** Only shown if A1 is "Yes" or "Not currently, but I have done so in the past".

In which type of organization do you mainly work? (A3)

- In-house / company
- UX agency / design agency
- Consultancy
- University / research institute
- Public sector
- Non-profit organization
- Freelance / self-employed
- Currently not employed in this field
- Other (with text field)
- **Type of question:** Single Choice (Mandatory)
- **Conditions:** Only shown if A1 is "Yes" or "Not currently, but I have done so in the past".

How many years of experience do you have in UX, user research, usability, HCI, or related work? (A4)

- 1 - 2 years
- 3 - 5 years
- 6 - 10 years
- 11 - 15 years
- More than 15 years
- **Type of question:** Single Choice (Mandatory)
- **Conditions:** Only shown if A1 is "Yes" or "Not currently, but I have done so in the past".

How often do you personally conduct, analyze, synthesize, or use the results of user research? (A5)

- Weekly
- Monthly
- Several times per year
- About once per year
- Less than once per year
- Never
- **Type of question:** Single Choice (Mandatory)
- **Conditions:** Only shown if A1 is "Yes" or "Not currently, but I have done so in the past".

In which country do you mainly work? (A8)

- Germany
- Austria
- Switzerland
- Other (with text field)
- **Type of question:** Single Choice (Mandatory)
- **Conditions:** Only shown if A1 is "Yes" or "Not currently, but I have done so in the past".

What is your disciplinary or educational background? (A9)

- Social sciences (e.g., psychology, education)
- Communication / design / media studies
- Technical (e.g., computer science / software engineering)
- Business / management
- Other (with text field)
- **Type of question:** Multiple Choice
- **Conditions:** Only shown if A1 is "Yes" or "Not currently, but I have done so in the past".

What is your gender? (A12)

- Woman
- Man
- Non-binary
- Prefer not to say
- Other (with text field)
- **Type of question:** Single Choice
- **Conditions:** Only shown if A1 is "Yes" or "Not currently, but I have done so in the past".

Category 2: Current documentation practices

Is documentation of user research required in your domain? (A7)

- Yes
- No
- **Type of question:** Single Choice

Where does the documentation requirement come from? (A7a)

- ☐ External factors (e.g., regulations, client policy)
- ☐ Internal factors (e.g., company policy)
- **Type of question:** Single Choice
- **Conditions:** Only shown if A7 is "Yes".

How often do you include the following information in user research documentation? (B5)

Items / Subgroups	Never	Rarely	Sometimes	Often	Always
Study setup					
1. Study goal or research question	☐	☐	☐	☐	☐
2. Research method used	☐	☐	☐	☐	☐
3. Participant or user group information	☐	☐	☐	☐	☐

Items / Subgroups	Never	Rarely	Sometimes	Often	Always
Research material and evidence					
4. Context-of-use information	☐	☐	☐	☐	☐
5. Raw data or source material	☐	☐	☐	☐	☐
6. Direct quotes or source excerpts	☐	☐	☐	☐	☐
7. User or stakeholder feedback	☐	☐	☐	☐	☐
Analysis and findings					
8. Findings or insights	☐	☐	☐	☐	☐
9. Evaluation results	☐	☐	☐	☐	☐
10. Confidence or strength of evidence	☐	☐	☐	☐	☐
11. Assumptions or open questions	☐	☐	☐	☐	☐
Use of findings in design					

Items / Subgroups	Never	Rarely	Sometimes	Often	Always
12. Design implications, recommendations, decisions	☐	☐	☐	☐	☐
13. Rationale for design decisions	☐	☐	☐	☐	☐
Documentation history and traceability					
14. Changes in interpretation over time	☐	☐	☐	☐	☐
15. Documentation authorship and update history	☐	☐	☐	☐	☐

- **Type of question:** Matrix / Array

Do you currently use any tools for documenting, organizing, analyzing, or reusing user research? (PreB2)

- Yes
- No
- **Type of question:** Single Choice

Which tools do you currently use for documenting, organizing, analyzing, or reusing user research? (B2)

User research repositories:

- ☐ Dovetail
- ☐ Condens
- ☐ EnjoyHQ
- ☐ Aurelius

Qualitative analysis tools:

- ☐ MAXQDA
- ☐ NVivo
- ☐ ATLAS.ti
- ☐ Other

☐ Other

Whiteboard tools:

☐ Miro

☐ Mural

☐ FigJam

☐ Conceptboard

☐ Lucidspark

☐ Other

Wikis, project, and documentation tools:

☐ Confluence

☐ Notion

☐ Jira

☐ SharePoint

☐ GitHub / GitLab

☐ Other

Note-taking tools:

☐ OneNote

☐ Obsidian

☐ Apple Notes

☐ Evernote

☐ MS Loop

☐ Other

Design and prototyping tools:

☐ Figma

☐ Adobe XD

☐ Sketch

☐ Balsamiq

☐ Axure

☐ Moqups

☐ Other

Office tools:

☐ Word

☐ PowerPoint

☐ Excel

☐ Google Docs

☐ Google Slides

☐ Google Sheets

Other:

☐ Local folders / shared drives

☐ Transcription tools

☐ Recording tools

☐ Other

- **Type of question:** Multiple Choice Matrix
- **Conditions:** Only shown if PreB2 is "Yes".

How is user research documentation usually organized in your work? (B3)

- Separately for each study/project
- In a cross-project repository
- In a product-specific repository
- In a team-specific repository
- Mostly in personal notes or local files
- Mostly ad hoc, without a consistent structure
- I don't know
- Other (with text field)
- **Type of question:** Multiple Choice

Who is usually responsible for maintaining user research documentation? (B4)

- UX researchers
- UX designers / product designers
- Product managers / product owners
- Requirements engineers / business analysts
- Developers / engineering team
- Project managers
- Knowledge managers / documentation specialists
- External consultants or agencies
- Everyone in the team
- No one explicitly
- I don't know
- Other (with text field)
- **Type of question:** Multiple Choice

What makes user research documentation difficult in your work? (B9)

- Not enough time
- Documentation is not prioritized by stakeholders
- Lack of templates / documentation standards
- Tools do not fit an end-to-end documentation workflow
- Unclear access to already documented research
- Sensitive data / privacy restrictions
- Difficult to connect raw data, findings, and design decisions
- Documentation becomes outdated quickly
- Documentation is too detailed to be useful
- Other (with text field)
- **Type of question:** Multiple Choice

What is the most important documentation problem you currently experience? (B10)

- [Open Text Field]
- **Type of question:** Open Text

Category 3: Documentation purpose and reuse

How important is traceability in your user research documentation? (B6a)

- Not at all important
- Slightly important
- Moderately important
- Very important
- Extremely important
- **Type of question:** Single Choice

How important are these different types of traceability? (B6b)

Traceability Types	Not at all important	Slightly important	Moderately important	Very important	Extremely important
1. Backward traceability (Being able to trace findings back to their source)	☐	☐	☐	☐	☐
2. Forward traceability (Being able to trace findings forward to design recommendations)	☐	☐	☐	☐	☐
3. Assumption traceability (Being able to distinguish assumptions from empirically supported findings)	☐	☐	☐	☐	☐
4. Contradiction traceability (Being able to document and connect	☐	☐	☐	☐	☐

Traceability Types	Not at all important	Slightly important	Moderately important	Very important	Extremely important
contradictory findings)					
5. Change traceability (Being able to see how findings or interpretations changed over time)	○	○	○	○	○

- **Type of question:** Matrix / Array

How important are the following purposes of documentation in your work? (B7)

Purposes / Subgroups	Not important	Slightly important	Moderately important	Very important	Essential
Understanding and analysis					
1. Supporting my own understanding	○	○	○	○	○
2. Supporting team understanding	○	○	○	○	○

Purposes / Subgroups	Not important	Slightly important	Moderately important	Very important	Essential
3. Supporting analysis and synthesis	☐	☐	☐	☐	☐
Communication and decision-making					
4. Stakeholder communication	☐	☐	☐	☐	☐
5. Supporting design decisions	☐	☐	☐	☐	☐
6. Supporting handover to design / development teams	☐	☐	☐	☐	☐
7. Onboarding new team members	☐	☐	☐	☐	☐
Future use, accountability and reuse					
8. Meeting regulatory, audit,	☐	☐	☐	☐	☐

Purposes / Subgroups	Not important	Slightly important	Moderately important	Very important	Essential
or quality requirements					
9. Creating structured input for later AI supported work	☐	☐	☐	☐	☐
10. Avoiding repeated research	☐	☐	☐	☐	☐
11. Reusing findings in later projects	☐	☐	☐	☐	☐
12. Preserving organizational knowledge	☐	☐	☐	☐	☐

- **Type of question:** Matrix / Array

How often should documented user research findings be reused beyond the original study or project? (B8)

- Never
- Rarely
- Sometimes
- Often
- Very often
- **Type of question:** Single Choice

Category 4: Current and past AI use

How familiar are you with using and critically evaluating AI-based tools? (A10)

- Not at all familiar
- Slightly familiar
- Moderately familiar
- Very familiar
- Extremely familiar
- **Type of question:** Single Choice

Which statement best describes your current use of AI-based tools overall? (A11)

- I have never used AI-based tools
- I have tried AI-based tools once or a few times, but I do not currently use them
- I use AI-based tools occasionally, but less than once per month
- I use AI-based tools about once per month
- I use AI-based tools weekly
- I use AI-based tools daily or almost daily
- Not sure
- **Type of question:** Single Choice (Mandatory)

Do you currently use AI-based tools for documenting, analyzing, structuring, or reusing user research materials? (C1)

- Yes, regularly
- Yes, occasionally
- I have tried it, but do not currently use it
- No, but I am considering it
- No, and I do not intend to
- I am not allowed to use AI for this
- I don't know / not sure
- **Type of question:** Single Choice (Mandatory)

Which AI-based tools or AI features have you used for user research documentation? (C2)

- ChatGPT / custom GPTs / projects
- Microsoft Copilot
- Google Gemini
- NotebookLM
- Claude / Claude Projects
- Perplexity / Spaces
- Notion AI
- Miro AI
- FigJam / Figma AI features
- Dovetail AI features
- Condens AI features
- Translation / transcription tools with AI features
- Other (with text field)
- **Type of question:** Multiple Choice

- **Conditions:** Only shown if C1 is "Yes, regularly", "Yes, occasionally", or "I have tried it, but do not currently use it".

For which outputs or documentation tasks have you used AI? (C3)

- Creating transcripts / translations from audio or video recordings
- Summarizing / clustering
- Coding qualitative material
- Suggesting codes or tags
- Clustering observations or notes
- Identifying themes or patterns
- Linking insights to raw data
- Searching or retrieving previous findings
- Comparing findings across studies
- Creating UX artifacts for the context of use (e.g., personas, user journey maps, scenarios)
- Drafting user needs or requirements
- Drafting design ideas or creating prototypes
- Drafting reports / stakeholder communication
- Other (with text field)
- **Type of question:** Multiple Choice
- **Conditions:** Only shown if C1 is "Yes, regularly", "Yes, occasionally", or "I have tried it, but do not currently use it".

What types of existing material have you provided to AI as input? (C4)

- Audio recordings, videos, transcripts
- Observations, survey responses, usability test notes
- Workshop outputs, whiteboard content, affinity maps
- Codes or coding schemes
- Context-of-use information (e.g., Personas, user journey maps)
- Research reports
- Requirements
- Design decisions
- Commented prototypes
- Stakeholder feedback
- Other (with text field)
- **Type of question:** Multiple Choice
- **Conditions:** Only shown if C1 is "Yes, regularly", "Yes, occasionally", or "I have tried it, but do not currently use it".

In your experience, how has AI support affected the following aspects of user research documentation? (C5)

Documentation Aspects	Much worse	Somewhat worse	No noticeable difference	Somewhat improved	Much improved
1. Time and effort needed for documentation	☐	☐	☐	☐	☐
2. Identification of patterns across material	☐	☐	☐	☐	☐
3. Clarity of summaries or reports	☐	☐	☐	☐	☐
4. Structure and organization of research material	☐	☐	☐	☐	☐
5. Ability to find relevant material again later	☐	☐	☐	☐	☐
6. Accuracy and reliability of documentation	☐	☐	☐	☐	☐
7. Communication with stakeholders	☐	☐	☐	☐	☐

Documentation Aspects	Much worse	Somewhat worse	No noticeable difference	Somewhat improved	Much improved
8. My own engagement with the research material	☐	☐	☐	☐	☐

- **Type of question:** Matrix / Array
- **Conditions:** Only shown if C1 is "Yes, regularly", "Yes, occasionally", or "I have tried it, but do not currently use it".

How often have the following problems occurred when using AI for user research documentation? (C6)

Observed Problems	Never	Rarely	Sometimes	Often	Very often
1. AI outputs required substantial manual correction	☐	☐	☐	☐	☐
2. AI missed important context	☐	☐	☐	☐	☐
3. AI overgeneralized from limited material	☐	☐	☐	☐	☐
4. AI produced unsupported or misleading interpretations	☐	☐	☐	☐	☐
5. AI created incorrect or weak links to source material	☐	☐	☐	☐	☐

Observed Problems	Never	Rarely	Sometimes	Often	Very often
6. AI raised privacy, confidentiality, or data protection concerns	☐	☐	☐	☐	☐
7. AI reduced my own reflection on the material	☐	☐	☐	☐	☐

- **Type of question:** Matrix / Array
- **Conditions:** Only shown if C1 is "Yes, regularly", "Yes, occasionally", or "I have tried it, but do not currently use it".

How do you usually check AI-generated outputs? (C7)

- I compare outputs with the original source material.
- I check selected parts of the output.
- I check only if something seems suspicious.
- I ask another person / the team to review the output.
- We use formal quality criteria or checklists.
- We use source links or citations provided by the tool.
- I usually rely on the output if it seems plausible.
- I do not systematically check AI outputs.
- Other (with text field)
- **Type of question:** Multiple Choice
- **Conditions:** Only shown if C1 is "Yes, regularly", "Yes, occasionally", or "I have tried it, but do not currently use it".

Have you ever decided not to use AI for a user research documentation task although it would have been technically possible? (C8)

- Yes
- No
- Not sure
- **Type of question:** Single Choice
- **Conditions:** Only shown if C1 is "Yes, regularly", "Yes, occasionally", or "I have tried it, but do not currently use it".

Why did you decide not to use AI in that case? (C9)

- [Open Text Field]
- **Type of question:** Open Text
- **Conditions:** Only shown if C8 is "Yes".

Why do you not currently use AI for user research documentation? - Data sensitivity and organizational restrictions (C10A1)

- Data protection / privacy concerns
- Company / client policy does not allow it
- I work with sensitive participant data
- **Type of question:** Multiple Choice
- **Conditions:** Only shown if C1 is "No, but I am considering it", "No, and I do not intend to", "I am not allowed to use AI for this", or "I don't know / not sure".

Why do you not currently use AI for user research documentation? - Access, skills, and adoption barriers (C10A2)

- I prefer manual analysis and documentation
- I do not know suitable tools
- I lack training
- **Type of question:** Multiple Choice
- **Conditions:** Only shown if C1 is "No, but I am considering it", "No, and I do not intend to", "I am not allowed to use AI for this", or "I don't know / not sure".

Why do you not currently use AI for user research documentation? - Concerns about AI quality and research integrity (C10A3)

- I do not trust the quality of AI outputs
- I am concerned about hallucinations / bias
- I am concerned about losing context
- I am concerned that AI could weaken my own understanding
- **Type of question:** Multiple Choice
- **Conditions:** Only shown if C1 is "No, but I am considering it", "No, and I do not intend to", "I am not allowed to use AI for this", or "I don't know / not sure".

Why do you not currently use AI for user research documentation? - Other (C10A4)

- [Open Text Field]
- **Type of question:** Open Text
- **Conditions:** Only shown if C1 is "No, but I am considering it", "No, and I do not intend to", "I am not allowed to use AI for this", or "I don't know / not sure".

Category 5: Expectations toward future AI support

At which stage of user research documentation would AI support be most useful? (D2)

- Before a study: planning, preparing, finding existing knowledge
- During a study: capturing notes, transcription, organizing material
- After a study: analysis, synthesis, reporting, reuse
- Across all stages
- I do not think AI support would be useful
- **Type of question:** Single Choice

What would you expect from future AI support for documentation work? (D3)

- [Open Text Field]
- **Type of question:** Open Text

Category 6: Risks and concerns

In your opinion, which AI-supported documentation tasks require the most human oversight? (E2)

- Transcription / Translation
- Summarization
- Coding or tagging
- Clustering observations or notes
- Theme identification or synthesis
- Formulating insight or finding statements
- Persona creation
- Journey map creation
- Design recommendation creation
- Linking findings to source material
- Confidence or evidence quality assessment
- Report writing
- Stakeholder communication
- Other (with text field)
- **Type of question:** Multiple Choice

What should AI never do in user research documentation? (E3)

- [Open Text Field]
- **Type of question:** Open Text

Category 7: Trustworthy and reflective human-AI collaboration

Which features would make AI-supported documentation more trustworthy? (F1)

- Direct links from AI outputs to source excerpts
- Clear marking of AI-generated content
- Confidence indicators
- Explanation of how outputs were generated
- Version history of human and AI edits
- Ability to compare alternative interpretations
- Commenting and approval workflows
- Control over which data AI can access
- Local or organization-internal processing
- Other (with text field)
- **Type of question:** Multiple Choice

How much control should UX researchers have over AI-supported documentation? (F3)

- Full control: AI should only act when explicitly instructed.
- High control: AI may suggest, but humans should approve all changes.
- Shared control: AI may automate some low-risk tasks, but humans approve important outputs.
- Low control: AI may automate most documentation tasks.
- Not sure
- **Type of question:** Single Choice

Category 8: Change over time

Compared with the time before widespread generative AI tools, has your documentation practice changed? (G1)

- Yes, substantially
- Yes, somewhat
- No, not really
- I am not sure
- **Type of question:** Single Choice
- **Conditions:** Only shown if A4 is "3 - 5 years", "6 - 10 years", "11 - 15 years", or "More than 15 years".

What has changed? (G2)

Changes in Practice	Much less		Not changed		Much more
1. Amount of material documented	☐	☐	☐	☐	☐
2. Use of automated transcription	☐	☐	☐	☐	☐
3. Use of AI for summaries, drafts, or structuring documentation	☐	☐	☐	☐	☐
4. Time spent checking or reviewing outputs	☐	☐	☐	☐	☐
5. Attention to source links, citations, or traceability	☐	☐	☐	☐	☐

Changes in Practice	Much less		Not changed		Much more
6. Concern about privacy or data protection	☐	☐	☐	☐	☐
7. Concern about documentation quality	☐	☐	☐	☐	☐
8. Stakeholder expectations for speed	☐	☐	☐	☐	☐

- **Type of question:** Matrix / Array
- **Conditions:** Only shown if G1 is "Yes, substantially" or "Yes, somewhat".

Category 9: Final comments

Is there anything else you would like to tell us about UX research documentation or AI support? (H2)

- [Open Text Field]
- **Type of question:** Open Text
